Projects // njvoulelis.github.io

EVENTAPP *(CURRENTLY IN DEVELOPMENT)*

EventApp is an application for planning events with friends and acquaintances. I chose to build this application because I felt there was a niche use for it. It also offered a great opportunity for CRUD functionality, one to many, and many to many database relationships. This project was built with C#, ASP.NET, MySQL, HTML, CSS, Razor, jQuery, AJAX, and more.

- Login and registration utilized frontend and backend validations
- Implemented the Google Maps API
- Created a live chat feature using SignalR

DOJOFOOTBALL

DojoFootball is a functioning fantasy football web application. I collaborated with two other students to bring this to reality. This project was built with Python, Django, SQLite, HTML, CSS, Bootstrap, and Jinja.

- Used an API to gather NFL player statistics and calculate a custom scoring method
- Implemented a draft feature and a matchup feature
- Personally coded our models, login and registration, and scoring method
- Used bcrypt to hash our users' passwords and verify them upon login

SHARESTREAM *(CURRENTLY IN DEVELOPMENT)*

ShareStream is an application that allows users to sync and stream Spotify playlists between user devices. This project was built with TypeScript, JavaScript, Node.js, Express, HTML, CSS, and Angular.

- Implemented Spotify OAuth
- Returned music playback to browser tab via the Spotify API
- Targeted a mobile-first design theme using Angular Material
